

SPEEDOMETER CABLE INSTALLATION

- ☐ 5. Remove factory-installed speedometer cable from speedo and pull cable with grommet through firewall from engine compartment.
- (A.) Install new speed control speedo cable to speedo and route through firewall into engine compartment. **NOTE:** Route cable in same manner as shown in **FIGURE 6**. Seat cable grommet firmly in firewall. **CAUTION:** Cable must not be kinked and cable routing must be smooth and free of sharp bends.
