

## SPEED CONTROL SERVO ASSEMBLY

- ☐ 7. Install the servo assembly to left front fender shield as shown in **FIGURE**
- (A.) Locate (3) dimples on left front fender shield and drill out dimples to 1/4" holes. Mount servo bracket to holes using nut and washers as shown. **NOTE:** Clean mounting areas to insure good electrical ground between bracket and fender shield and between servo and bracket.
- (B.) Mount servo assembly to mounting bracket with nut and washers provided.
- (C.) Connect vacuum hose provided to servo port and carefully route hose to power brake booster. Remove cap from booster outlet port and cut hose for proper connection, attach hose to port. **FIGURE 8.**
